&
vehicle counting and tacking in OpenCv.

❖ **Final Year Project**

- ✓ **Software Sales Manager**

Software Sales Manager (SSM) e-commerce platform is an API, It's a project that provides software engineers, web designers and developers a platform to sell their digital products so they no need to have cart, ssl and payments on their web site. They will have Profile, Widgets, Social media, Affiliates, Analytics and Communication pages so they can carry out their business with their own way. The most but not the last significant facility of the product would be the license key generation mechanism that will protect the theft and misuse of their product.

Technologies Used:

Laravel framework, AngularJS , Html5, CSS, Adobe Photoshop, MySQL, Twitter Bootstrap
